NEWS, REVIEWS, HINTS AND TIPS FOR YOUR MACHINE

LEMMINGS ON THE FAMICOM P.24

CARS AND DRIVERS

The beginning of 1992 will see the release of Cars and Drivers by Electronic Arts. The game takes the best bits of Test Drive, Hard Drivin' and Indianopolis 500 and rolls them into one incredible racing challenge.

Featuring a series of different tracks, the idea behind the game is to drive some of the world's top cars. Jump into either a Ferrari F40, a Lotus Turbo Esprit, a Porche 959 or even a Corvette and you're off!

Featuring some pretty impressive 3D routines, the game gives an overhead view of the track before revealing the vehicle which has been selected. Once inside you can take a quick glance at the dashboard before hitting the accelerator.

The programmers have perfected the 3D shadow effect and now you can even see the car's silhouette following you around the course!

Actually controlling the motors will take some practise if you want to break records, but both novice and expert drivers will enjoy the thrills of Cars and Drivers. Due soon from Electronic Arts, initially on the PC.

V FOR VICTORY

the authors of Harpoon. Megafortress and Armour Alley comes V for Victory, perhaps the most complete strategic WW II game ever.

Programmed with both the die-hard strategist and novice in mind, V for Victory is a real-time war game that recreates the battles between the German and Allied forces on the north

coasts of France, and in particular the struggle for the control of Cherbourg.

All actions have been simplified to allow an easy-to-use point and click control method. Would-be generals can assume responsibility for all their force's moves, while newcomers may prefer to let the computer assume the role of second in command.

The action takes place both during the night and day and players can choose whether to take control of the German or Allied troops.

Released by Electronic Arts. V for Victory will initially be available for the PC and Mac. Decisions are still being made concerning an Amiga version.

TENNIS CUP 2

For a while Tennis Cup reigned supreme, then came Pro Tennis Tour 2 and Loriciel's sports game was knocked off top slot. February however, should see Loriciel returning back to its rightful place when Tennis Cup 2 hits the streets.

Looking remarkably similar to its predecessor, Tennis Cup 2's main differences lie in the improved control methods. Unlike other games of similar ilk, Tennis Cup 2 will let court aces play against competitors who have never

hristmas time usually sees one or two movie smashes, and 1991 was no exception. Ocean is soon to release its conversion of the season's mega movie, The Addams Family. Due for release in March, the game will be available on the Amiga, ST, Amstrad, Spectrum, Commodore 64, Game Boy, NES, and Super NES, to name but a few.

The Addams Family will take the form of a platform game with a sprinkling of arcade-adventure for good measure. Featuring all the usual characters: Morticia. Gomez, Lurch, Fester, Frump, Pugsley and Wednesday, your task is to rescue the members of the whacky family, while avoiding all sorts of traps in the process.

The Addams Family is being programmed in-house at Ocean and resembles a combination of Sonic, Super Mario and Mickey Mouse! Looking at these screen shots it's going to be an enormous hit.

HEROES OF THE

arch will see the landing of Electronic Arts' Heroes of the 357th. Following on from the Chuck Yeager air combat game, Heroes of the 357th involves you as one of the legendary members of the 357 squadron, an elite group of bomber pilots.

The game sees your P-51 escorting the likes of flying fortresses on bombing runs deep into the German heartlands. You'll be called upon to perform a number of missions, ranging from lightning strike bombing missions, strafing runs, fighter interceptions and escort duty.

Visually stunning, Heroes of the 357th looks to be a real corker. Players may choose from single missions or complete campaigns, as well as selecting the difficulty level of the action.

The PC version is due for a March release.

AVENGER

Wow, what a year 1991 was for our Liverpudlian friends at Psygnosis. Cracking games such as Leander, Oh no! More Lemmings and Barbarian 2 all helped to make this one of the world's greatest software companies.

1992 looks as though it could be even better, and April will see yet another mega game coming from across the

Mersey. Avenger sees you leaping into the cockpit of either a F-14 or F-18 as you set off on a mission to wreak havoc on the enemy.

wreak havoc on the enemy.

Patrolling designated areas you'll have to keep your eyes peeled for all manner of potential targets; gunboats, Scud missile bases, convoys, bridges, trains and enemy HQs – all of which make for excellent cannon fodder.

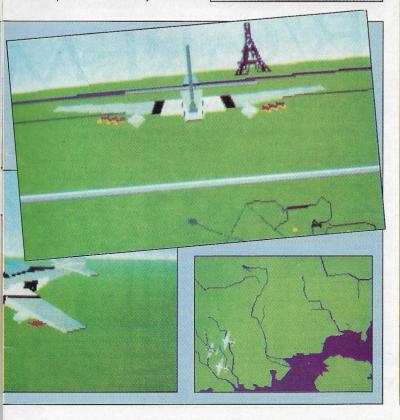

Avenger sees you attempting missions during the day and night and will test the most skilled pilot's reactions. Play Avenger as either single missions or an entire campaign, the choice is yours.

even been on a tennis court. Tennis Cup will allow you to set the computer help levels, meaning that if you are brill at backhand but sad at serving you can tell the computer to intervene on your behalf. Players can try their hand against each other or the computer, in both single and doubles matches.

Tennis Cup 2 will be released by Loriciel in February and will be available for the ST, Amiga and PC.

Win at Game Boy Games and also Super Mario Bros.

ne of 1991's strangest arcade games was Atari's Ramparts. Well, Electronic Arts has signed it up for what looks like a February release.

The game itself is a subtle blend of arcade action and intense strategy. Played against either a friend or the computer the game is split into offensive and defensive stages.

When attacking your opponent the idea is to smash the walls of the enemy fortress to pieces. The defensive section is similar to Tetris in that you have a limited time to place blocks in strategic positions; it is this section of the game that sorts out the men from the boys, and the women from the girls!

Ramparts will be available from Electronic Arts on the Amiga, ST and PC. Watch out for it!

MORE VIRTUAL REALITY

e ince Games-X first reported on Dr Jon Waldern, the inventor of the virtual reality arcade machines, W Industries has turned into an international business.

The virtuality studio has since been busy designing and building new games and machines which it reckons will take the near-real experience an amazing step further.

Just before Christmas, W Industries introduced Exorex. In this game you pilot a giant two-legged machine inspired by the AT-ST walkers in Star Wars. Stomping through the city you must stalk your opponents and blast them to pieces with metal melting heat rays.

In contrast, also designed for the CS 1000 is an epic Dungeon and Dragons game called Legend Quest, which hit the streets this week. Set in Medieval times, up to nine players can participate, taking on the guise of stock D&D characters. There's even a facility to link up to other machines. Watch out for reviews of both machines in future issues of Arcade Extravaganza.

Here is a list which has been compiled by GX, with the help of Centresoft and Leisuresoft, to keep you up to date with all the games which will be hitting the shops in the coming week.

There may be some changes to the release dates of some of the games but keep an eye on the shelves, these games shouldn't be too far behind the date indicated.

FRIGHTENINGLY TEMPTING

o mark the launch of Virgin's astonishing shuttle simulation, *Games-X* and Virgin Games, present a G-Force pulling chance for you to be a winner.

Would you like to be the cool dude strutting down the street in a stylish Virgin designer bomber jacket and T-shirt with a copy of the Epic Shuttle tucked under your arm? If so, then prepare to put pen to paper.

SPOILT FOR CHOICE

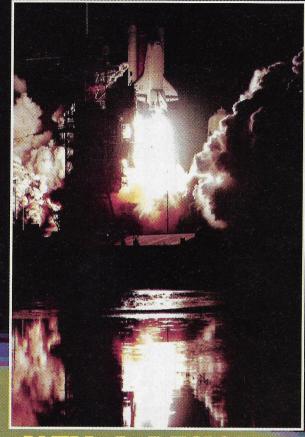

Meanwhile, the 10 runners-up will receive a super Virgin T-shirt and recent Virgin game of their choice on the format they prefer.

There for the taking are such chart busting titles as Jimmy White's Whirlwind Snooker, Realms, and Rolling Ronnie.

To emerge a winner, just answer the following questions:

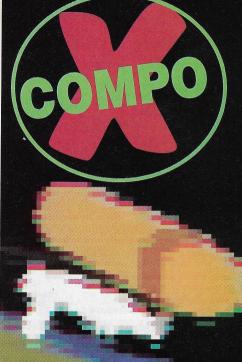

- Name the first man to step on the moon.
- What was the name of the first shuttle to achieve a successful mission?
- True or false. A dog was sent into space during the first Russian space programme.
- 4 I would like to live on the moon because... (in not more than 10 easy words.)

Remember to post your entries to: Games-X, Europa House, Adlington Park, Macclesfield, Cheshire SK10 4NP. Entries must arrive before 6th February 1992.

TRAS

The dustbin on my Amiga is supposed to remove unwanted bits, but it never seems to get rid of anything.

When I'm on
Workbench, I drag
things into it and they
promptly disappear,
but when I load up
again, they are still
there. Why? I don't
have the same trouble
on my ST.

Basically, the Amiga 'trashcan' acts like any other window on the screen, except that it's visually most different, you can't delete it or move it into a drawer. So when you think you're getting rid of some piece of information you're actually storing it away for the time being.

To erase the information for good you have to highlight the trashcan by clicking once with the mouse, and then selecting the 'empty trash' selector.

The unwanted material will then be mere seagull fodder for the great computer rubbish tip.

The ST, however, is much more straightforward. A simple case of dragging the unneeded stuff from its present position so it goes over the wastebasket. You are then asked if you want it deleted. A simple yes or no answer will suffice by clicking with your mouse.

In both cases, it's no good erasing things from the trashcan unless your disk is read-writable.

Move the plastic tab so you can't see through it, otherwise you'll never be able to remove anything!

Welcome to the penultimate instalment of the essential help guide for all newcomers to the Amiga and ST computer scene. We have endeavoured to cover most problematic aspects which people encounter, but if there are any more, let us know.

I bought my Atari ST second-hand but both the joystick and mouse don't always work. If I wiggle the connector around a bit it works for a while, but then stops when I'm on my way to a high score. What can I do?

A common problem this, especially for second-hand users of Atari STs. The problem is caused by frequent changes at the joystick and mouse ports.

Eventually, natural wear and tear damages the connections and ruins accurate play, and can even result in their complete failure.

Take it to a reputable computer repairer, or if you're a dab hand at electronics and the warranty's finished, you could try resoldering the damaged connections.

You could also send it back to Atari or Commodore, but be prepared for a fairly lengthy wait.

When I turn on my
Amiga it always asks
me to insert the
Workbench disk. This I do and
everything seems fine but when
I try to load my latest game,
nothing happens and I can't get
it to load. Please help!

Although the Amiga asks for a Workbench disk to be inserted when you turn the computer on, it doesn't necessarily require one to work. Most games 'autoboot' without

FILO FA

Everything was working fine until the other day. A message came up on the screen and now I can't load most of my favourite games. What's happening and what can I do?

The sad face of modern computing is the emergence of viruses. You may have heard of them in the news, erasing valuable information from computers of large companies. Unfortunately, they also strike the humble home computer.

Viruses come in many guises, all with the intent of duplicating themselves without the user's knowledge, damaging data and disks, or simply ceasing game operations. Without any warning, the first thing you notice about them will probably be an on-screen message or corrupted disks.

Once you know you're infected switch off your computer via the power and remove the infected disk.
Leave for at least 30 seconds

to ensure it is finally erased from memory, otherwise the virus can be transferred to the next disk.

The removed disk will now be hot, so keep it separate from the others, and it's advisable to seek out a decent virus killer and protector from a reputable Public Domain library. Try some of the adverts within this issue.

Use the virus killer program and check ALL of your disks. It only takes one to infect the entire bunch again. Hopefully the virus killer will remove the virus, protect your disk and repair the problem.

However, if you have a particularly virulent virus, the data may be irrecoverably damaged and lost forever.

If the virus killer doesn't recognise the virus, ask around. Most virus killers are quick of the mark with new strains, but until you can get one, write protect your disks (see last week) and cold start your computer each time, by switching off your machine for 30 seconds for each game.

Workbench, in fact they necessitate a start from afresh. So to load your game simply ignore the Workbench prompt and insert the game disk.
Easy, don't you think?

I can't make head nor tail of the delete and the back arrow key.

When I type things and use one of them, everything seems to go

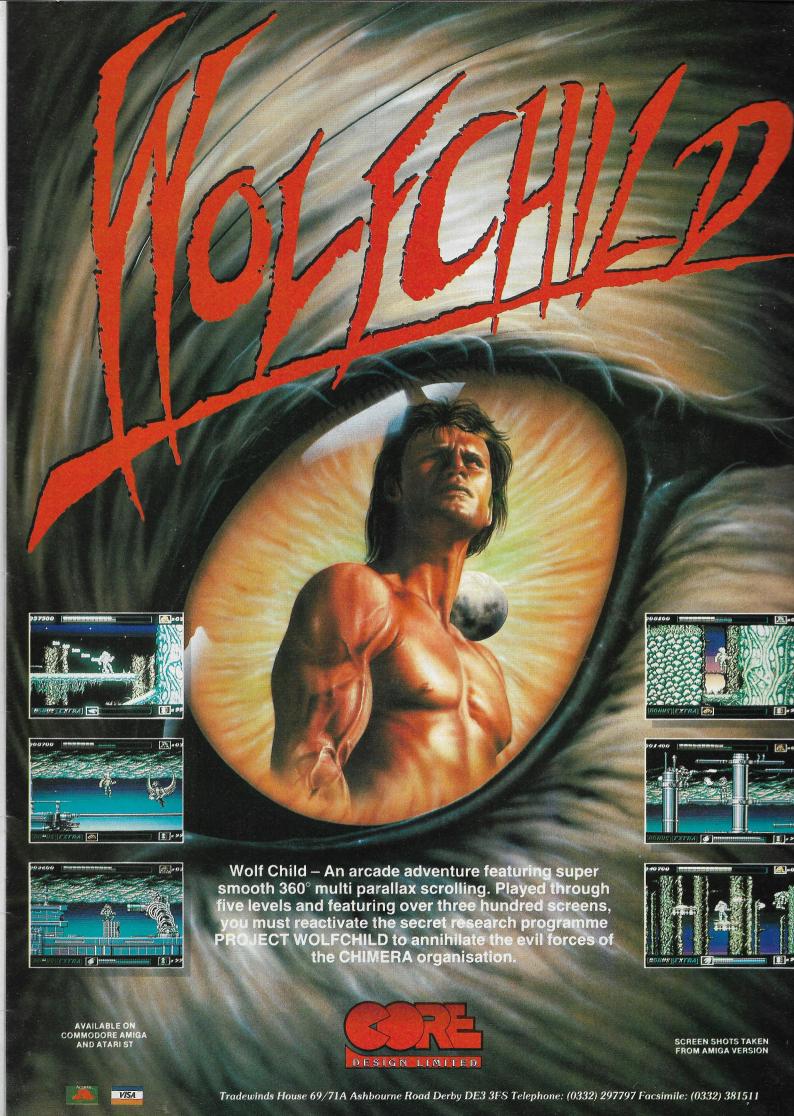

weird and the wrong text disappears. Can you explain simply what is what?

The delete and backspace/back arrow key have different functions.

If you remember that the delete key removes characters after the onscreen blinking cursor, and the backspace/back

arrow key removes characters immediately before, things should become a lot clearer.

Use the arrow keys
to move the cursor
around the document
and, depending on the
position of the
unwanted text in
relation to the cursor,
use the appropriate key
to remove it.

ROBO SQUASH ROBOTRON

adly, Harlequin's home is not as he once remembered. His childhood days spent roaming intricate passageways without a locked door to hinder him, accompanied by the echoes of laughter, are long gone.

Returning to the place where he spent his youth proves to be rather worrying, for the castle had been locked and a sign, hung on the front, states that the eternal clock is out of order. The reason? A broken heart.

Harlequin is a huge platform adventure, spanning the realm of Chimerica, into which you must find a way through the portal.

Once inside, your exploration of the 23 levels in search of the four pieces

that make up Chimerica's shattered heart begins in earnest. Suitably attired, you start outside the castle.

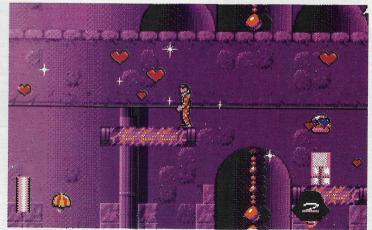

As the saying goes, the only way is up, so use the platforms to make your way to the top of the tower. During your adventure you'll be attacked by the many

irate inhabitants that are quite happy with Chimerica the way it is, and will consequently try to stop you, no matter what.

SPRING-LOADED FEET

Harlequin leaps across huge gaps with ease, hangs from ropes, and balances on thin ledges due to his gymnastic skills.

He retains momentum during his jumps, so a long run-up will allow him to

Among the many bonuses hidden inside the Jack-in-the-boxes are hearts which equip the hero with a powerful shot, capable of inflicting more damage on your unsuspecting opponents

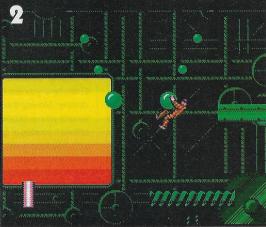

As an extremely agile character he has a wide variety of gymnastic skills available to him, including sticking to steep surfaces...

..leaping with natural balance onto distant platforms and swinging ape-like on ropes...

leap further. Be careful though because falling too far saps away at his energy, despite there being an umbrella that can be collected to slow his descent.

The space hopper, another collectable, can be used to bounce across some of the larger stages.

Harlequin has a metamorphic ability in that he can change into an angel fish when a vast expanse of water has to be crossed. Firstly he must collect the piscine icon, then yank down on the joystick and press fire.

Time is against him in the water for he has but a limited supply of oxygen which can only be replenished by resurfacing. Each bonus lasts for a limited time only too, so take care,

Other power-ups hidden inside jackin-the-boxes include fireworks which offer protection from danger, hearts which boost his firepower, and the burger which tops up his energy bar.

Moving platforms tend to drag Harlequin to his demise, while slippery surfaces provide the perfect ending, causing our hero to fall off a platform and into a pit brimming with corrosive acid.

EXPANDING CASTLE

Many of the levels initially seem impossible, but levers hold the key to locked doors. Pulling on the switches often engages a mechanism and a new platform or portal will appear.

These allow you to reach new, unexplored areas of the castle, more often than not hiding another level which must be activated.

Each of the 23 levels is set against its own backdrop, ranging from a nursery school in the stage titled 'the Learning curve', to a fireridden land in the 'Helzapoppin' level.

The sewers are running with rats but, regardless, you must dive into the murky depths to explore the hidden pleasures of the underwater world.

Only after an indeterminable time clinging to a ledge and swinging on a rope to avoid the razor-sharp spike will Harlequin hopefully find the key to Chimerica's broken heart.

Harlequin is another in a long line of releases from Gremlin which are simply first-class

pieces of software. Take, for example, Lotus Turbo Challenge 2.

OK, it doesn't break any barriers in originality but it is one of the best, if not the best, in the genre. The same applies to Harlequin.

Every little detail has been scrupulously catered for, right down to the immaculate animation and the superb sound FX.

Graphically the game is faultless, including detailed and often colourful backdrops. The Harlequin sprite is well defined and superbly animated, while the other sprites, namely the plethora of nasties that come to attack you, are equally impressive.

Onto the sound; a pleasure to the ears. The main in-game effects are accompanied by a little ditty that bounces along through the action.

The FX themselves comprise of grunts and groans from Harlequin himself and explosions that erupt when he's fired upon.

Superb presentation is all too often let down somewhat by a lack of gameplay. Your worries can be assuaged here though.

Harlequin is easy to play yet simultaneously difficult to complete, thanks to the 23 levels of taxing platform gameplay filled with masses of strange creatures.

Vast expanses of unexplored territory can be touched upon, and there exists lots of little things of interest to see and discover to further enhance the product.

All this adds up to a fast platform romp set over a large game area, which is both pleasant to look at and a real treat to play.

£25.99 OUT FEBRUARY

ST users will be pleased to hear that the conversion Atari ST looks equally as impressive and is both graphically and sonically very close to the Amiga version, bar a slight loss in sound.

Gameplay still remains intact, adding Harlequin to the long list of 'must buys' from Gremlin.

onan is one browned off dude. His village has been demolished by the forces of Thoth Amon, his wife murdered and all that he loves has been eradicated as though a mighty hand had simply scooped it all away.

In order to avenge the murder of his wife, Conan must leave the smoking ruins of Irskuld and travel south to the land of Hyborea...

PREPARING FOR BATTLE

Moving first to the seedy town of Shadizar, a haven for thieves and vagabonds, Conan gets his first taste of what is to come.

He soon learns that the world is changing under the influence of Thoth Amon and a new regime of terror is emerging from the lands of the south. From here you are in control of Conan's destiny. Moving the barbarian along the streets you must guide him through three different phases of gameplay.

Initially you will manipulate our hero on a 'world' level. Here you are allowed movement between the numerous cities of Hyborea. The view is a detailed, top down display of all areas and you have free reign to explore the land before you.

The next phase is more specific and allows for exploration of defined areas. Again, this is an overhead view but now you have the opportunity to move through the streets or passageways of your current location.

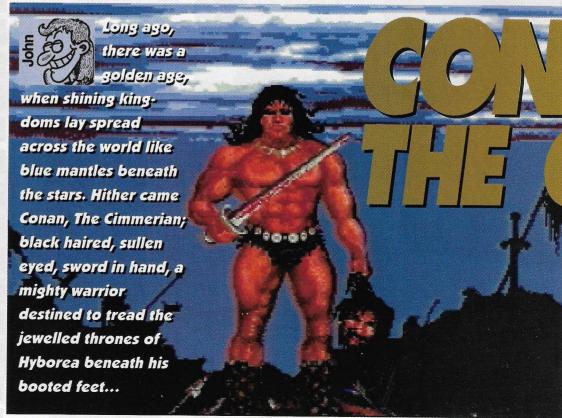

Initially this will be the city of Shadizar, where you will visit shops, traders, inns, taverns and temples, but

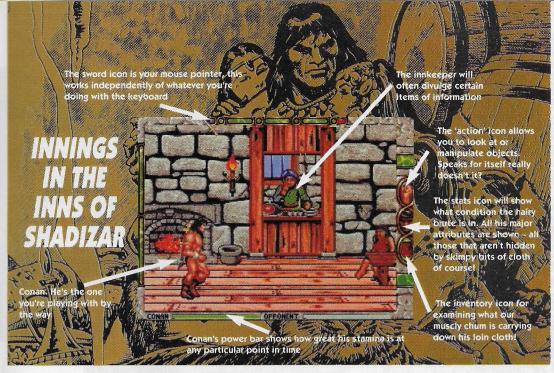

later you will move through underground passageways and jungle territories.

The last phase is a close-up - 'scene' - level and is a single screen

Fighting is a simple process but requires certain skills which can be bought'. Visiting experts of the art will allow you to expand your swordplay repertoire, thus making progress through meanie infested territories much easier!

ROLE-PLAYING BEAT'EM-UP

Your travels through this combination of role-playing, arcade adventure and beat'em-up will take you through many vast areas.

First you will explore the streets of Shadizar, followed by the dark and dangerous underground complex. From here you must travel to the jungle ruins

Finally you reach the greatest of all Hyborean kingdoms, Aquilonia, and its capital - Tarantia. Here you will find Thoth Amon's palace and it is here that your final conflict will take place.

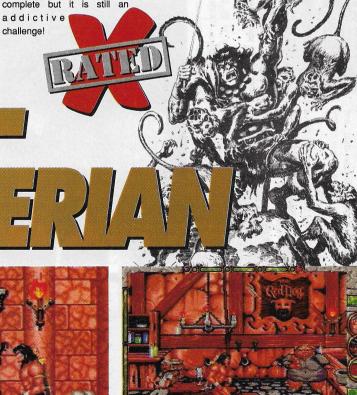

All of the areas are on a truly massive scale and filled to the brim with characters to interact with, hostile creatures with which to do battle and minor quests to undertake.

A game of such scale would appear to be for adventure nuts only, but a friendly user interface makes this an easy game to get into. It'll take a while to complete but it is still an

Robert E Howard's Conan is (along with Michael Moorcock's Elric) one of

my favourite literary characters and up until now games based on these classic stories have unfortunately turned out to be gross misrepresentations of just what he's all about.

That is until now of course! With Virgin's excellent adventure/RPG we are treated to a truly superb game that will hold your attention for some considerable time!

Graphically it is truly excellent with some beautifully drawn screens. Animation is good, especially if you have a speedy PC, and as long as you have a 386 machine, even the scrolling is OK!

On a 286 based PC you will have to allow for some glitches and inferior graphics manipulation, but this is at no detriment to the game itself. Initially it can be a little off putting but I'm sure you'll be able to cope!

Gameplay is what really shines here though! Having installed the game first thing in the morning I played it almost continuously all day, and never grew tired of it! It's not often that I can say that of a game of this type.

It really is something that you can immerse yourself into and you will quickly grow used to the strange world of this fabled hero.

Control of your character is very simple indeed, utilizing a friendly combination of mouse and keyboard which few people should encounter problems with.

On the whole this is a superb game which I can heartily recommend to everyone! Certainly something to ease games players into the joys of roleplaying adventures.

h what, another beat'em-up for the Mega Drive? But is DDII any different? It should be, in view of the fact that the Double Dragon products are famous for how good they are.

Double Dragon II is a game for one or two players, the brothers Billy and Jimmy Lee. The duo have a tough mission ahead of them, and they won't be able to rest easy until they have successfully defeated the ninja clan that stand before them.

One of the pair's girlfriends has been kidnapped, although at the beginning of the game you see her being brutally qunned down by an oversized thug.

As the last two survivors of the Dragon clan you can hardly stand around and do nothing, so you decide to avenge the girl's death, kidnapping, or whatever else has happened to her.

The game is set over four levels, not

a great deal compared to the eight featured in Streets of Rage. Using your relatively limited movement you must set about defeating each of the Black Warriors before going on to face the huge end-of-level adversaries.

Pressing button A and C makes you attack to the left and the right respectively, while B makes you jump. Tapping A or C while in the air will make you spin-kick or, it you're moving, perform a flying attack.

Apart from the standard attack, you can pick up weaponry which can then be used against the enemy. The collectable items include whips and spades, as well as huge steel balls and wooden crates, useful for lobbing at the opposition.

What on Earth happened to the decent Mega Drive beat'em-up? Double Dragon II is utter dross. The game looks like a Master System cart and the sound is diabolical.

To further add insult to injury it plays like a wet tea towel, although you could probably get more fun out of the latter. Avoid at all costs.

Lemmings has finally made it onto the Famicom, but did the Japanese make a decent job of the conversion? Read the review to find out, and feast your eyes on the New Year's Lynx titles...

1992: THE YEAR OF THE LYNX

1992 looks set to be a busy year of outstanding releases on the Atari hand held, the Lynx. There are absolutely oodles of releases planned over the next 12 months, which include a number of conversions of smash-hit coin-ops.

The first release is **Xybots** which should be on the streets by the time you read this. Following this is are no less than nine new titles due for release in early '92.

The cartridges include **SuperSqueek**, a mixture of colourful graphics and fast arcade action, and **Toki**, as most will know, a playable coin-op conversion with first-

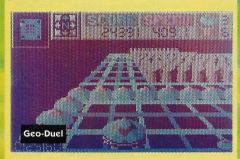

class presentation and, above all, outstanding gameplay. The Lynx version of Hydra is said to be superior to the arcade original, and Telegames' Krazy Ace is set to be another winner.

ATARI'S LYNX OFFERINGS

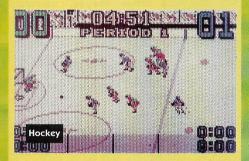

Next on the list is Dirty Larry Renegade Cop. This is Atari's biggie for the first quarter of 1992, and combines beat'em-up action with huge sprites and earsplitting sound to make probably the most memorable release for the Lvnx.

Geo-Duel is an immensely playable futuristic cart. while the next title, Basketbrawl, delves into streetfighting, with a little ball thrown in there just for good measure!

The last two scheduled releases are both hot sports sims. Hockey looks set to blitz its way onto the Lynx, and finally NFL Football will hopefully be the best American Football game to appear to date.

Look out for full reviews in Games-X, as we bring you the latest word for the up and coming Lynx.

acmania is the latest in a long line of Pac-Man related games, such as the original Pac-Man, Ms Pac-Man, Pac-Land, and now the 3D Pacmania.

Pacmania is theoretically the same as the original title, but in 3D. You must still run around the mazes chompin' dots and avoiding ghosts, but now you can see Pac-Man's smooth behind as well as his face

Well, that's the game. Now on with the finer details. Well there aren't any really, apart from the new ability that Paccy has gained.

He can now jump if you tap button B, and if A or C is held you engage the booster which increases Pac-Man's running speed.

As normal, the four power-pills located in each of the four corners of

the maze allow Paccy to chomp away at the wandering ghosts, although this effect is only temporary.

There are four different levels, starting with Block Town. This is the easiest stage and resembles something from Lego box. Following on from that is the Pac-Man and then Sandbox land.

The last stage, Junaly Steps, can only when you have finished the others, and upon completion of this final level will take you back to beginning, although the meanies will be tougher than before.

Pacmania is a very disappointing release. TecMagik's 8-bit version was quite good despite the control system being a little dodgy. Unfortunately though, the Mega Drive cart fails to hit the mark because of the awkward control method.

The game also repeats itself and only has a total of four levels, which I find disgusting when taking into account the Mega Drive's capabilities.

GAME: LEMMINGS MACHINE: FAMICOM PRICE: 650.00 SUPPLIER: CONSOLE CONCEPTS

t had to happen, didn't it. At some point those disgustingly cute rodents would sneak their way onto every format imaginable. The Famicom is the latest target to suffer their wrath.

Anyone who knows anything about computer software will realise that Lemmings is the biggest thing since the since the leader displays a lower IQ than a strawberry blancmange, the resulting action usually culminates with the entire Lemming population either walking off a cliff or being mutilated in some other disgusting way.

This is where the player comes in. It is your simple objective to rescue the half-pint creatures before they wipe themselves out. An easy task on a flat landscape, but unfortunately this terrain is far from that!

The Lemmings drop from one or more starting points and must be guided across the area to the exit. You have to Lemming build a bridge right across a huge chasm.

The lone Lem may then have to dig through the ground to make the escape route clear. Finally, turn the blocker into a bomber, watch him explode, and follow the Lemmings into home base.

Despite sounding rather easy, the landscape is often torturous. The path is more often than not blocked by vast expanses of water, sheer cliff faces or even steep drops.

To complement these natural hazards, hidden traps could be activated, squashing the Lemms into a gooey mess.

release of the ZX81, and stands aloof as the best game ever, on any machine.

Why? Simple. Not because it requires compact disc technology to recreate perfect digital sound, neither because it needs a ridiculously expensive processor to run the game, but because it is so infuriatingly addictive.

This is mainly due to the game's simplicity, and even though each Lemming may be less than a centimetre high, the graphics succeed in creating the ultimate cute 'n' cuddly character – a short rodent with green fluffy hair, donning a blue tunic.

Lemmings are downright stupid. They'll follow each other anywhere, and

rescue a set quota of the rodents to progress to the next stage.

To help you save as many as possible you have eight skills to assign to the Lemmings. These are climbers, floaters, bombers, blockers, bridge-builders, bashers, miners and diggers.

Fairly self-explanatory, a combination of such skills is required to make your way safely to the exit.

For instance, you may have to first block the oncoming creatures to stop them from dropping off a cliff, then make a lone

There are over 100 levels in all, each one becoming progressively more difficult. The first section,

entitled 'Fun', allows you to familiarise yourself with each skill, whereas the latter stages, namely 'Mayhem', will test your thinking powers as well as your reactions.

Brilliant, simply brilliant. There is no other way to describe this game. It is the best, and will remain so for quite some time to come.

I was a little worried that the joypad would not be able to cope with the speed at which you have to move the cursor around, but thanks to a number of short cuts that have been implemented, the Famicom version plays every bit as good as the Amiga original.

The graphics are exactly the same apart from the new intro and enhanced icon sheet, and the sound is just as humorous as it was before. A must to buy, even if you have to sell your granny in order to grab a copy!

them before in the likes of Nemesis and R-Type. You come armed to the teeth with highly powered weapons with which you may do as many violent things as you wish.

As usual you are up against an array of alien weaponry sent out to destroy you and, as ever, there is a generous splattering of end-of-level bosses and bonus weaponry to bolt onto your ship.

Fighting through this game is a very difficult challenge. Although at first you'll seemingly die every few seconds, try to persevere and your reward will be the discovery of an addictive game underneath, with a few handy continues to use when you lose all your lives.

The graphics are very

detailed and the scrolling is very smooth indeed, not to mention fast! On level two in particular the background, rippling like water, is very impressive.

The only problem lies in the fact that this is identical in every way to the Mega Drive version and for that it doesn't stand out as a classic on the Famicom.

I know the Famicom can do better than this and it is just a shame that the developers didn't try to improve on it. Shoot'em-up freaks will love this but anyone only geared towards an occasional blast will be better off playing something a little easier!

GAME: DIMENSION FORCE MACHINE: FAMICOM PRICE: £50.00 SUPPLIER: CONSOLE CONCEPTS

ho remembers 1942 in the arcades? Good innit? You would, understandably, think producing a game of this classic status on the Famicom to be a good move.

However, the designers have replaced the P-47 with a helicopter and in the process produced a below average shoot'em-up.

You fly up the screen shooting down wave after wave of enemy aircraft that range in size from the small to the unfeasibly large. Of course, the larger they are the more shots they will take to get rid of.

There is also an added extra effect which allows you to swoop in low to the dirt and blast all the installations on the ground.

The enemy is far from defenceless and will shoot back at you at any opportunity, thus making your life very hard indeed. You are armed with an ever increasing arsenal which, powering up the further you proceed, will make dying almost an impossibility.

Graphically this is far from the best on the Famicom, something it seems the programmers knew.

They have tried to cover up the blandness of the sprites by including some of those ever so pretty rotating effects used in games like Pilotwings. Sadly even these look poorly done.

The sound consists of some very

monotonous firing and exploding effects but thankfully over the top of this plays a military style tune which keeps the effects from becoming too annoying.

This is anything but the best shoot'em-up on the Famicom and you'd be better off avoiding it and trying your hand at Gradius 3 instead, a truly class game. The asking price is also a touch too steep.

oh, look! Another shoot'em-up! This time around your feet are set firmly on terra firma as you engage in the role of a brave knight fighting bravely against evil, paranormal forces over eight different scenarios.

No one knows why the knight is fighting these evil forces; maybe he's had washing stolen, maybe he is just

bored and fancies a bit of action or maybe, and this is the most probable, his girlfriend's been kidnapped (groan!) and you have to rescue her.

When you start the game you have a

appears and is wiped out with ease.

Lying scattered around the play area are various chests which when shot open enable you to collect extra energy, shields or better weapons, depending on what appears before you.

If it is a weapon, for instance, you can keep shooting it to cycle through all the various shots and select the one you feel looks the best.

After a while of constant slog you'll come to an end-of-level nasty-type thing which you must kill before going on. These take either more hits than usual or more accurate shooting to destroy.

You can also travel through river and swamps, immersed half under the water. In the rivers you may have a bit of trouble trying to battle with the current but nothing too serious, while on the other hand swamps tend to slow down your walking speed.

All graphics are well defined and the enemies are all very well animated, the

long snake being my particular favourite.
The backgrounds too are detailed and
have some great touches.

The spot effects are good and set the atmosphere for the game very well. There is also an above average tune that plays throughout but is slightly quieter than it should be (in my opinion) to make the effects stand out more prominently.

The only real problem with the game is the difficulty level, which, even when set on easy, still remains very taxing. After a while though you'll learn to control your anger and find yourself advancing through the game at a respectable pace.

Nintendo SUPER FAMICOM

What a super-duper whopping great big hooby-dooby shootyshooty game this is eh? I bet all you lucky lads 'n' lasses are

dying to know a cheat for it aren't you? Well, if you want to receive full power-ups, simply pause the game and then enter the following: Up, Up, Down, Down, Left (button not pad), Right, Left, Right, B, A, Unpause. Now you got el destructo city!

Thanks to a lovely chap by the name of S Fotakis from London, I can now present you with the level codes for this old-style platform

Level 1: OMEGAMAN Level 2: PATRICIA

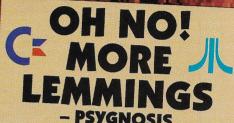

Level 3: REDDWARF Level 4: DEWSBURY

- OCEAN

Yet another little tip where our little rodent buddy can come in useful! When you get to the bit where you need to seriously waggle your stick around, simply pause the game, and stick your furry friend into the joystick port.

Then unpause the game and wiggle your chum around in an anti-clockwise direction. Hey presto! Your special move at mega high-speed! Thanks to Chris Dennis from Solihull for pointing that out.

Looks like Oh No! More Lemmings is the game of the moment judging by your letters demanding level codes! A few of you have sent some in, and for this I am very grateful. As for the rest of you - get weaving! Send your tips to: Tip-X, Games-X, Europa House, Adlington Park, Macclesfield **SK10 4NP.**

Ooh goodie! Lots of lovely space filling Lemmings' codes to fill up the Tips page for the next few weeks! I've printed the Tame codes before, but I can now safely tell you that we have all 100 codes in the office! Here are the codes for the Crazy level:

1: TFLCAHVERD 2: FLCIHUTGBL 3: NCALWTFHBM 4: CKLTTGNIBF 5: CCHSUFLJBM 6: IHSUFLCKRO 7: LRUGLCCLBN 8: RUGLCKLMBG

10: FLCKHWUOBI

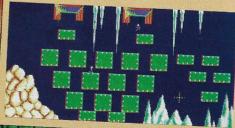

14: KHPTLICCCI 15: LSVLICADCI 9: VFNCAHUNBN

16: RVLKCKMECF 17: TDOCCHWECE 18: DOCKITTGCP 19: ICAMVVMHCR 20: CIMUVLIICI

11: NCAMUUFPBE

12: BIMTUNLOBR

13: CEHPTDOBCP

ANDER

For those of you who have been battling through the second world, but can't quite reach world 3, I can now reveal the secret pass code! Simply enter LVFT in the appropriate place and Robert is indeed a close relative on your mother's side.

A BUNCH

EXOLON - Redefine your keys as Z O B R A to gain infinite

CYBERNOID - Redefine your keys as Y X E S (Sexy backwards) for infinite lives.

XENON - Press Break and hold down the keys T I N Y to become immune.

NARC - Redefine keys as G R U T S for infinite lives and a message.

TURRICAN - Hold down N O V to gain 99 lives.

Thanks to Andrew Checkley from Worcestershire for those. All you Speccy owners can stop whining now can't you?

It's a bit hard this one 'innit? Blinding speed and a ridiculous number of aliens make Cardiaxx one of those games that is just crying out for a player's guide. For those of you in a spot of bother here is the definitive guide on how to work your way through this gruesome challenge.

CE

LEVEL ONE

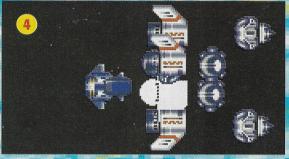

The mid-level guardian in the first level is the first major obstacle that you will encounter. Try to get as close as possible to it and move your ship very slowly. Keep between the gun turrets and blast away for all you're worth. Gently move the gun and clown with it.

The edge-hogs appear continually and can be easily disposed of by a simple method applicable throughout the game. Follow each around moving as slowly as possible. As soon as it's dead move on to the next target as quickly as you possibly can to save time

The spirally R-Typey thing is most quickly destroyed by blasting at the head. Try to quickly move backwards and forwards as you go about your task

The end-of-level guardian is a bit of a pussy really. Just move in close and fire barrage after barrage into the central 'eye'. Use similar tactics for the mid-level guardian

DEEP SPACE LEVEL ONE

This first space section is reasonably tame. If you keep your finger down on the fire button and stay near the centre of the screen you shouldn't have any problems whatsoever!

LEVEL TWO

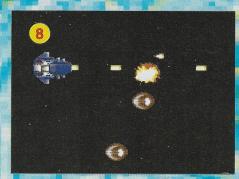

The first snakes that you'll encounter in this level come out of this hole in the bottom of the screen. Move over to the right a bit, turn round and move up and then disappear into the hole above. All you have to do is sit between the two holes and keep blasting away

The spiral bubbles move very quickly indeed and must be knocked out with great speed. They will twiddle around all over the place and once the line is broken they will bounce around in a much more random fashion

Beware of the missile pods!
Some of the rocks in this level will mutate into these missile spitting monstrosities!

The end-of-level guardian for level two is just as much of a pussy as the level one guardian! Looks a bit familiar as well doesn't it? Use the same tactics as previously outlined

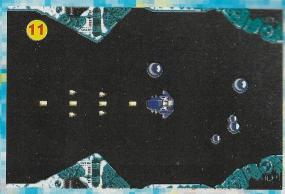

DEEP SPACE LEVEL TWO

watch out for the flying saucers in this section since they tend to swarm together where there are a lot of them on screen. Hold down fire and create a 'ripple' effect with your laser across the entire screen

LEVEL THREE

The spiral bubbles again! As before they react very quickly but in this case they are much more vicious. You'll have to stay on your toes

There is a rock storm within the level which can easily be handled by shooting all the rocks. Keep towards the top of the screen

Large swarms
of the saucers
appear yet
again! These
can be quite
easily handled
by staying in
the centre of
the screen and
just blasting in
all directions!

Wot? Another end-of-guardian that looks exactly the same as the others? Guess what? You can beat it with exactly the same tactics as all the others in the game!!!

DEEP SPACE LEVEL THREE

Yet again you will encounter the ships that swarm but here you will find that they move considerably faster and are much more accurate. Move around very quickly and zip backwards and forwards firing all the time. There is no strict strategy for this level because the ships are random

LEVEL FOUR

An ENORMOUS wave of bubble aliens! Try and stay to the left and keep firing into the middle. When it disperses try and wipe the aliens out as quickly as you possibly can

A huge wave of ships looking remarkably similar to yours homes in for the kill! It is very fast and will move in on you wherever you are. Keep rapidly changing direction and try to keep firing at all times. The wave won't last long!

The end-of-game guardian!!! Look! It doesn't half look familiar eh? And guess what? You can use exactly the same tactics as before!!! Just stay really close and stay in front of the orb-like eye. Keep shooting and they will both soon explode

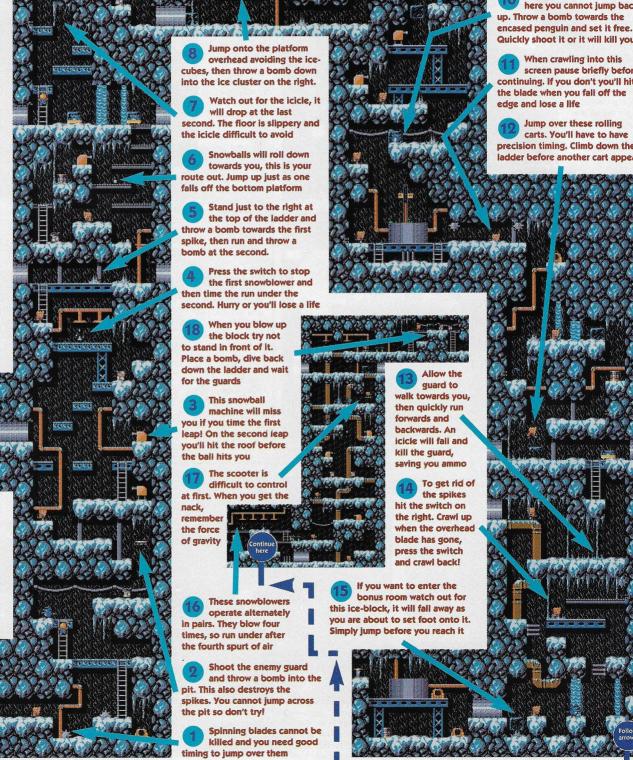

The second part of our requested guide on Rick Dangerous 2, also happens to be level 2 of the game. Funny that, isn't it! Anyway, let's get on with telling you about the brief stop off in a particularly chilly spot...

LEVEL TWO - THE ICE CAVERNS OF FREEZIA

Don't even think about standing on this block. Instead, go and push the switch and it will fall out of the game, allowing you to progress Once you have fallen down here you cannot jump back

Quickly shoot it or it will kill you! When crawling into this screen pause briefly before continuing. If you don't you'll hit the blade when you fall off the

Jump over these rolling carts. You'll have to have precision timing. Climb down the ladder before another cart appears

RENEGADE

HIT SQUAD £7.99
OUT NOW 16-BIT

enegade was a smash hit on the 8-bit machines years ago, and despite the fact that it could be looped a number of times during each play it was still the best beat'em-up available. Now it arrives on the 16-bit machines, and is it as good?

Nope! The graphics are unbelievably blocky and messy, they may have looked OK if this was released when planned all those years ago. Now it looks very dated.

Not only does it look bad but also the sound and gameplay are of an equally low quality. On top of all this the game takes an incredible amount of time to load, so you'll sit waiting for it to load longer than you'll play the game!

X-RATING: X

STUNT CAR RACER

KIXX £7.99 OUT NOW 16-BIT

Not many driving games come close to the quality of this high action speedster. It involves the player racing around eight different circuits, all of which are raised above the ground. While you race you must also try and beat another driver around three laps.

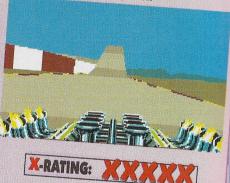

The tracks are filled with enough jumps, bumps, ramps and banked curves to make Evil Kinevel break out in a cold sweat! The game is viewed from inside the car with the circuit drawn in high-speed vectors while you look out over the huge engine of the car.

As a one-player driving game this would

have been great but with the computer link option which allows two players to race head-to-head it is nothing short of superb.

The only problem I can find is that there is only one other car on the track. Buy this now and you won't regret it!

X OUT
KIXX 67.99
OUT NOW 16-BIT

he prequel to the highly praised Z
Out is unleashed onto the budget
shelves and in my eyes is far better
than the follow-up.

OK, so the game style isn't very original but the setting is fairly new. This is a horizontally scrolling shoot'em-up set in the murky depths of an ocean.

You control one of four highpowered submarines as you battle
through the many alien-filled levels.
Any points that you score during the
game can be used as money between
levels where you can upgrade your
weaponry and buy extra subs.

Presentation is still above the standard of many full price titles being released at the moment and so is the gameplay. The graphics are all very well drawn and the sounds are all perfectly defined.

Oh, and for those who are just a little curious, the title is pronounced "Cross Out"!

X-RATING: XXXXX

ROBOCOP

HIT SQUAD £7.99
OUT NOW 16-BIT

nyone who, like me, thoroughly enjoyed the film on which this is based will be vastly disappointed with this game.

It involves you playing the role of Robocop to patrol the streets of Detroit and halt violent crimes in a host of platform shoot'em-up levels.

The graphics for this are the best bit about the game but they are far from being excellent. The digitized speech is so laughably bad that I had to turn off the sound while playing.

However the main problem with this Robocop is that it is so unbelievably easy to complete. Level one is the hardest level and if you complete that then you'll complete all of it.

Obbins with a capital 'B'!

X-RATING:

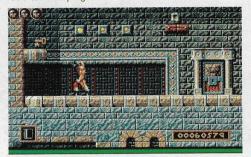

PLAYING GOD

Please can you help me 'cause I'm stuck on Gods. I can get to world one on level two and kill everything but I can't get any keys. I can collect the fire, ice and water gems but I don't know how to use them. Please answer me as it's driving me crazy.

PS: Games - X is fab and $Dr \ X$ is much cooler than Uncle X.

PPS: Can I have a T-shirt? Christopher Gordon, Glasgow.

Dr X: Well then Chris, you seem to have done everything except what's required. You dizzy soul! To get past this level you're on the right track with the three gems, but you've got to use them correctly in the gem room to make progress.

Here I kindly show the room you have to visit. Having switched off one light, I simply have to return with the other gems and, bingo! The key is lowered and you can sing praises for Dr X and country

The gem room has three lights to be turned on. Carry one gem at a time and walk past the lights, the gem will automatically disappear and the light will turn on. Repeat for each. The key on the ledge will gradually lower, collect it and find the exit yourself!

Yes Games-X is fab, I only work for the best, and thanks for the compliment. Uncle X is nothing more than an uneducated lummox! I'd love to send you a T-shirt, but Unc has them under lock and key and refuses to let you have one, the spiteful swine.

AIN'T NOTHING BUT A HOUND DOG...

Please, please, pleeeeease help me! I've been playing that excellent adventure game, Maddog Williams for quite a while now and I'm completely stuck. You see, I've got through the tunnels etc etc and got to the Cyclops. The thing is, how do I get rid of him? I'd be so grateful if you told me; it's giving me sleepless nights!

G Smith, Edinburgh.

Dr X: If you think Maddog Williams is tricky, you ought to try dealing with my missus, she's a real mad dog, but that's another story. To get past the Cyclops is simplicity itself and is done in the usual Maddog humour.

Approach the Cyclops, but before you reach him,

A splash of cold water does wonders when you're snuggly tucked up in bed. Why this screen, with no Cyclops? Because I was too grumpy to play that far into the game, thank you very much

drink the Potion of Changes. This turns you into a rock and, befuddled by the situation, the giant promptly kicks you off screen into the village. Et voilà! You can continue your quest unhindered.

GRIMSBY FISH DOCKS

I have a problem with Robocod. I can complete the first door but I am stuck on the first section of door two. How do I get to the exit? Do you have to go up to the top of the coloured sky? And if so, how? I hope you can help me.

Joe Card, Mereworth, Kent.

Dr X: Well Joe, you are a card aren't you? You're certainly not an ace because your problem is so pitiful I simply had to answer. That is, after I finally managed to recover from my fit of laughter. I can't believe you're stuck on such an early level, and you've still got the audacity to write to me about it!

The elusive exit on the first part of door one. I've explained how to get here so I'll be damned if I'll show you again!

I'm not one to mock poor unfortunates like yourself, although I'm tempted, sorely tempted. The second level exit is easy enough to find and to get there you simply have to leap on the moving chocolate blocks. Your problem, I believe, lies here.

When you reach the fluff at the end, extend your body upwards to grab the platform, then leap from one small fluffy bit to the other. The exit is further along and down one of these. Surely, you can find it yourself.

A POEM

American football is the best, With John Madden and the rest, So if you could make some arrive,

The year wanes mercilessly on, soon the trees will be a'blossom and the lambs a'leaping. Ahh. Sooner the better. Once winter has moved on I might be in a better mood but until then, be warned! A wise man once said, "a game's only as good as the player, but no game is better than Dr X." Need I say more? Prove this point by writing to: Dr X's Country Clinic for the Gamingly Insane, Games-X, Adlington Park, Macclesfield SK10 4NP.

Without having to be deprived,
Of spending money for years on end,
Upon me you could depend,
To buy your mag until I die,
Because your mag is the best I can buy.
PS: Dr X is the best at Games-X.
Peter Fellows, Bridghouse.

Dr X: Very fancy Peter, but what's your problem? I've got this inkling that you're on the grovel for a free game or two. I'd love to help but I'm afraid to succeed as an aspiring poet you have to understand the quality of human suffering. So hop it.

Here's a pretty picture of the game which inspired the poem. Shame I'm not sending it to him, never mind. I may be tempted though, that is, If I receive some better poems, let's hear from all you closet Shelleys

Try going to school with jelly in your shoes or even stand naked in a frozen pond and then, who knows Peter, we may have a new Poet Laureate on our hands.

ELFY DOSE OF HELP?

Please can you help me on the second part of level three of Elf. I attacked the man with the boxing glove to get the password, I used the knife to get the gold statue out of the cage, I gave the guard the password and then gave the statue to the Indian chief sitting outside the temple. The chief took the statue and said I could pass if I wanted to but when I tried to pass the door was locked. Help! Pauline Matthieson, Glasgow.

Dr X: Now that's my kind of letter with no ambiguities. Unfortunately, your problem shouldn't exist. You've done everything correctly and I can't understand why you're stuck. The only tip I can offer is to move to the door ensuring the joystick is held to the right. That's all!

ou are setting forth into another place, another time, another world," said Treguard, The Dungeon Master, "And what makes you think that you four mere mortals will succeed in the Quest, when so many others have failed?"

I understood, at that moment, that our mission was going to take all our endurance, all our collective skill, and, most of all a depth of courage, that I wasn't sure we possessed.

Ever since ITV's award-winning series hit our screens, the world has been waiting for a computer game worthy of the name. The wait is over.

Tony Crowther's amazing re-creation has everything.

Using the same game system that made 'Captive' adventure game of the year for 1990, 'Knightmare' makes dungeons and dragons games seem like newts splashing around in a muddy puddle.

'Knightmare' is a sophisticated role-playing adventure where you are

challenged to solve complex puzzles, logic problems and riddles that reveal a rich. ever-more rewarding storyline.

Your journey takes you deep into the dungeons of Dunshelm, to a cataclysmic meeting with Lord Fear and the unthinkably horrible FrightKnight.

Whether or not the meeting is terminal is up to you. You will need wisdom, tenacity, alacrity and, above all, courage.

But you have all those things, don't you...?

Available for Amiga & Atari ST

MINDSCAPE

This week, we're taking a break from the Pacmania Challenge to venture forth into Robin Hood Country for a trusty Street Talk at Megacom in Nottingham, a shop brimming with oodles of goodies from the Land of the Rising Sun.

SKETAL

Adrian Draper (16)

A t the moment I'm saving up for a Super Famicom. I'm thinking about getting Super Soccer because it's really good but I also like

Street Fighter. My second choice would be an Amiga. I certainly wouldn't get a Mega Drive; they're too overrated.

I'm a big football fan and support Nottingham Forest. I like a bit of rave music, you know, something to get down to.

Jason Rutherford (17)

've got a Mega Drive and a Famicom; my favourite is the Famicom. Games aren't too expensive and since they're imported they're usually pretty good. The worst game is Castlevania IV which ain't no fun at all.

I watch a lot of football, I'm from Nottingham but I support Leeds United. I like anything musically, but Indie mainly. As games machines go, anything will do.

Junior (17)

've got an Amiga but I also borrow such others as the Mega Drive, PC Engine and Super Famicom. Some games are better on different machines; the PC Engine is good for shoot'emups, the Mega Drive games tend to be easy.

This week in

Nottingham

and the Famicom has better graphics and the zooming in and out is much better on it.

Decapattack is such a rip-off, the ultimate useless game. Thunderforce III is still good and Sonic has great graphics. Pitfighter is a good conversion, it's just a shame about the zoom in and out though.

Dean Benell (17)

n my Nintendo Game Boy the soccer game is my favourite, while the worst has to be Tetris which comes with it. It's awful. I'm quite happy with my Game Boy and I'm not looking for any other machines, although the Famicom is OK. I like weightlifting in my spare time and I do the occasional water skiling.

Kon Dan (12)

S treet Fighter II is dead good but I don't know what my favourite game is because I've got lots. Altered Beast

is rubbish. My favourite machine is the Mega Drive. It's really good. I play it a lot and aren't bothered about others like the Famicom. I really fancy a Mega Drive CD, it's really good, especially a game on it called Creep Busters.

Adrian Doyle (28)

ames like Fantasy Zone II are really good, and Alex Kidd in Miracle World is brilliant. I've got the Sega Master System II, the new one with the disk drive thing or whatever on

it (?). The kiddies have the first one that came out and every now and again I have a look around, get a few bits and bobs, and swap 'em with brothers or whatever.

I'm a curry man and I like a Chinese takeaway now and again. I do full contact karate twice a week and I'm a second Dan Black Belt!

Thomas Williams (19) and Kennedy

he Mega Drive is my machine which I've only just got and I like Sonic the Hedgehog on it. I play football, I don't really watch it, I play for Clifton All-Whites. Talking of sport, sport games are meant to be really good on the Mega Drive and when I get some more money I'll be able to buy more.

Phillip Evans (24)

y experience of playing is that my friend bought a Mega Drive a week or so ago and I'm thinking about buying one or a small hand held Sega. The hand held has a TV tuner so I'm tempted with that.

We try to get

directly.

anything coming out

in Japan first by

importing

I come into this shop especially because it has Japanese imports which really aren't available anywhere else. I'm not particularly sure what I want, I thought I'd check things out. I cycle and play football and I'm a season ticket holder for Nottingham Forest.

SHOP TALK

Shop Managers - Kelvin Choong (25) & Steve Low

he shop has been open for two years now and has branched out from distribution and changed its name to Megacom. The best-selling machine is definitely the Mega Drive, with Sonic the Hedgehog being the top game.

The ones that sold the most

1...Sonic the Hedgehog

2.....Pitfighter 3.....Robocod

5.....Quackshot

We have the Mega Drive CD ROM, Super NES and Famicom, the Neo Geo and PC Engine with its CD ROM, as well as all the latest gadgets.

We supply to big companies like Microbyte and both mailorder and distribute all around Europe. We only sell 16-bit machines because they are much better.

1991 was one heck of a year for the Gremlin Graphics crew and 1992 looks set to be even better! Market leader of the car racing genre, the Sheffield-based software house is ready to take on the strange world of lantasy role-playing with its mega game, Daemonsgate.

CANOSCIE! DOROMASKEY

ix months ago all contact was lost with the ancient kingdom of Elsopea. The rulers of the civilised kingdoms didn't fret too much though.

The Elsopeans were a strange race and since the fall of their empire, over a thousand years ago, they had lived in reclusion, rarely coming into contact with their neighbours.

Two months ago reports began to filter in from the small hamlets situated to the south of Tormis. Fresh rumours abounded of a large Daemonic army, moving through the

boarder peaks from Elsopea and laying waste to everything directly in its path.

Although the garrison at Tormis did attempt to impede the army's advances, this was to no avail.

Soon Tormis itself fell under siege and cries for help from other cities were ignored as the world prepared for the worst.

Alone and without aid from neighbouring cities, the downtrodden inhabitants of Tormis could do nothing but sit and wait it out.

It seemed the Daemonic army had the same idea, being content to encamp around the city walls and let the people of Tormis stew.

BEHIND CLOSED DOORS

Two weeks into the siege and the people of Tormis were still remarkably calm. However you, Captain Gustavus of the Imperial Tormishan guard, were summoned to a secret meeting of the city council who had hatched a last ditch plan to save the future of their homes.

No one knew why or how the Daemonic hordes appeared; the reasons behind them laying waste to the ancient land of Elsopea remained shrouded in mystery, as did their hunger to snap up new civilized worlds. The only link known to the council was the rumour of an elderly man from Elsopea. Spotted near the Attien City, it would fall to you to locate and question the fellow.

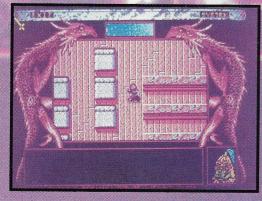

Gathering together an elite band of mercenaries you must find a way out of the city.

Speed is of the essence because although the city can indefinitely withstand the siege, a prolonged assault would have disastrous effects. God speed and good luck!

Daemonsgate is set within a world called Hestor. The programmers have painstakingly recreated a complex civilization including realistic ecology, logical geography and also a complex social structure.

Created over a period of six months, the world of Hestor is one of the most realistic fantasy environments ever created for a computer game.

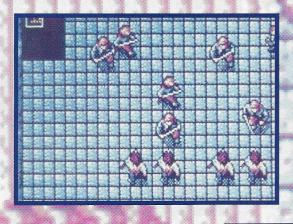

As Captain Gustavus, your task is to uncover the mysteries behind the Daemonic army's origins. You will control a party

the characters are intelligent inhabitants of the world who, when not part of the group, go about their business completely independently of the players' actions.

In addition to your character, there are another 32 individuals willing to join you and a further 128 major non-player characters essential to solving the mystery.

Available verv Daemonsgate will appear on the Amiga and ST at £34.99 and the PC retailing for £39.99.

Gremlin is also running a competition in conjunction with the game.

Contained in the packaging are a number of questions which can only be answered by having played the game.

The first person to answer all of the questions correctly will win themselves a life-sized ornate broadsword!

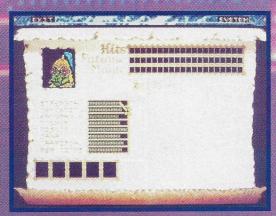

Communication between the many different inhabitants of Hestor is essential if you are to succeed in your mission

IN A WORLD OF ITS OWN

Daemonsgate consists of five major gameplay elements: land travel, town travel, combat, conversation and magic.

Played within a huge area, the complete game covers about 131,200 playing screens, and will therefore take day, weeks, even months to complete!

game has programmed by Leeds-based programming team, Imagitec, and will be released under the Gremlin banner.

Deciding which of the land's warriors to recruit can be a trifle tricky. Check out their individual stats and skills to discover which one may be of the most use

Deep among the stars lies a desolate moon; a seemingly barren wasteland and inhospitable planet. Dune, however, is the most important star in the galaxy. It holds a secret that many would die for...

rank Herbert's epic science fiction novels have caught the imagination of thousands of readers and even inspired a blockbusting movie. The game follows the book's storyline very closely as you assume control of Paul Atreides.

Son of Lord Atreides, Paul is the heir to a wealthy nation. Unbeknown to him, he is the son of Bene Gesserit, priestess.

Although the mystical Bene Gesserit is forbidden to bare male children, legend has it that a child would be raised and would possess unimaginable powers. Is young Paul the fabled Maud'Dib?

DOWN IN THE DUNES

Dune is the only place where the most precious substance known to man can be found – the Spice Melange, vital to space travel and for expanding life and consciousness.

The universe is ruled by the Padishah Emperor. In turn, certain sectors are governed by races and Arrakis is under the rule of the war-like Harkonnens, a brutal, determined people.

Baron Harkonnen is at liberty to surrender the Spice Melange to the other galaxy Houses, but instead he stores it for himself and declares war on the House of Atreides.

Having assassinated his father, the Harkonnens look set to conquer Paul's inheritance but the Baron has failed to foresee Paul's meeting with the Fremen. It falls to him, with the skilled warriors, to put paid to the Harkonnens' schemes and ensure the survival of his House.

Available from Cyro Software and Virgin Games, Dune will be out on the PC and will be released around Easter time.

The Fremen are a noble and highly sophisticated race. Shunned by the Harkonnens they could be the vital link if Paul is to save his family and his honour.

The Baron's blood-thirsty son looks rather like a rock star with a criminal record. Hating the Atriedes, he's a most worthy opponent

Large, blubbery, brutal and in need of the F-Plan diet, the Baron Harkonnen is not a man to be crossed

NEW YEAR'S GREETINGS

I've been collecting Games-X for ages and I've got nearly every issue. I own a Game Gear and have only got two games, Monaco Grand Prix and Wonderboy.

When will Chase HQ be coming out in Britain? Where will I be able to find it? How much will it cost?

PS Happy New Year!!! Right, now that I'm the first person to wish the *Games-X* team a Happy New Year don't I get an utterly brill *Games-X* T-shirt like the lad in issue 33 who got one for being the first to wish you a Happy Christmas, please?
PS What is Shinobi like on the Game Gear?

Andrew Martin, St Asaph, Clwyd.

Unfortunately there are no plans as yet to bring Chase HQ out on the Game Gear.

If you like beat'em-ups give Shinobi a go. It's a great game with an X-rating of four and a half. As for the T-shirt, sorry, but you ain't the first so no deal.

TRADE OFF

First I would like to ask you to print this letter, if you do I will send you two (two, not one mind) cheats for the arcade version of Bubble Bobble.

Next I have some questions...

- 1. Can I get R-Type for the Amiga on budget, and is it any good?
- 2. Is Wacky Racers (Amiga) any good at all?
- 3. Is there any difference in the quality of budget games, compilations and full price games?
- 4. I have had my Amiga for about three to four weeks now and although I

have read the manual all the way through, whenever I try to format a new disk a requester comes up saying either disk is unreadable use disk doctor to correct it, or disk structure is corrupt use disk doctor to correct it.

I bought my Amiga second hand and it's only half meg. I use one meg Ds, Dd disks, would this make a difference at all?

Please, please, please help me as I am desperate.

PS I won't beg you for a T-shirt, but if

you want to...

Mark Edwards, Tenterden, Kent.

Right, get those cheats in the post – they had better be good!

- 1. The Hit Squad has released R-Type for the budget price of £7.99 not bad for such an excellent game.
- 2. This is a £7.99 budget title from Hi-Tec. Aimed at the younger end of the game playing population it's quite an addictive driving game.
- 3. Many full price games, after being out for around a year, are released as budget games. On the other hand there are some games which are programmed especially for the budget market. These tend to be of a very tried and tested formula and do not exhibit any new or spectacular characteristics.

Compilations consist of either budget or full-price games which have been on sale for a while, or a mixture of both.

4. The half meg refers to the RAM which your Amiga has, this is chip memory. As far as the disks are concerned, one meg is the amount of memory available on

the floppy and all Amigas can read/write one meg disks, so no problem exists there.

Are you using second hand disks?
If so they could be duds and I'd suggest that you go out and buy some brand-new ones. If the problem still persists there might be something wrong with your machine and it may need repairing.

power this letter. I have that

Pleeeese answer this letter. I hope that everyone at *Games-X* had a very happy Christmas and New Year. I had a brilliant

I think it is unfair that games like Terminator 2 and Teenage Mutant
Hero Turtles should be number one just because they were good films,
LETTER when a really good effort and game like Mega lo Mania should be
number one. So get it together software houses and make a game that lives up to
its film twin.

PS Don't you hate that man who advertises Home Pride Cook in Sauce?

PPS I have every single issue of *Games-X* since number one, so I've probably paid for that T-shirt by now.

Mario the Hedgehog, Camborne, Cornwall.

Games from film licences hit the top of the charts by riding on the success of the film. For example, if someone is well into the Turtle craze, you know they have the T-shirt, toothbrush, action figures, watch, cuddly toy... they are going to go out and buy any Turtle game that appears on the shelves.

In the past, software companies have experienced difficulties when trying to produce a playable game which is based around the film. These range from time restrictions to film company controls. Despite this, with success guaranteed, do the software houses really need to try that hard?

I agree about the guy on the ad. He is nearly as annoying as the Doc. (Yes, but I make a much better Chicken Madras – Doc).

Post to: Games-X Classifieds, Europa House, Adlington Park, Macclesfield, Cheshire SK10 4NP. one as I received an Atari Lynx with two

Well now, considering I have had a Spectrum all my life you can imagine my reaction when I switched it on! I was astounded at both the graphics and sound, and the gameplay was stupendous (Don't get carried away now! – Doc). Of course the disadvantage was that I could never get my dad away from it for more than five minutes.

Chequered Flag was so smooth and addictive, and as for Blue Lightning... well it was so fast and furious! The sound through the headphones is really quite magical.

- 1. Will there ever be a magazine dedicated to reviewing the Lynx and its software only?
- 2. Will Lemmings ever be released for the Lynx?
- 3. Could you please tell me some future releases for the Lynx?
- 4. Since this is the first time I have written to you could I please have a fab T-shirt for 1992?
- PS I hope 1992 is a good year for all of you.

Alan Nolan, Newtownards, Northern Ireland.

I take it you approve of the Lynx then!

- 1. Considering the limited amount of software which is available for the Lynx it is very unlikely that there will be a magazine dedicated solely to this hand held. Unless that is, a one-off mag is produced. Watch out in GX for special hand held supplements in the near future.
- 2. Yes, sometime during the July to September period '92.
- 3. Early in '92 expect to see Super Squeek, Toki, Hydra, NFL Football, Geo-Duel and many more. Watch out for reviews in Console Connexions.

SMART ALEG

I think your mag is great. I have only just started to read it and I think that it is brilliant. I have a few questions for you.

- In your opinion which is better, the NES or the Master System?
- 2. Which do you think is the better game, Mario or Sonic?
- 3. I have recently bought Wonderboy in Monsterland for my Master System,

could you please give me a rating for it. I am really sick and tired of your smart comments. Would you please stop! (Hear! Hear! – Doc).

PS Don't send me a T-shirt because I don't want one.

Alan Bergin, Kildare Town, County Kildare.

- 1. The Master System comes out just ahead of the NES in terms of graphics and sound.
- 2. Personally Mario is my favourite, it's annoying, but totally addictive.
- 3. Although GX didn't review this game Al 'Console' Simmons has played it. The verdict? Four Xs.
- 4. That's probably just as well...

TEAM TALK

Contrary to previous bulletins, it has now been established that Nick's pinball machine has been repaired. Hurrah!

It is not yet clear what this has to do with the mysterious appearance in the GX office of a very large cardboard box which mysteriously contains many empty game boxes.

Nor whether the recent arrival of a Golf game on the Famicom, which has sorely tried the patience of just about everyone, is in any way connected with such a speedy repair job.

Only one thing is certain; the calendar Nick also received for Christmas is not going to last the year, since the witty jokes and pictures it contains have already had Feargus beside himself with laughter, and one Feargus is quite enough, thank you!
